**Subject:** Des Moines TCE (DICO) Fesability Studies

The Iowa DNR has reviewed the OU-2/4 FS for building removal and remediation of the South Pond Area (SPA) at the Des Moines TCE Site (DICO). The Department has no substantive comments about the limited options presented in the FS other than the 1996 OU-2/OU-4 ROD, as currently written, may not provide for building demolition/removal. Also, the RP or other interested parties may wish to present other remedial options. EPA and the Iowa DNR should be receptive to reviewing any alternatives that meet the remedial objectives and statutory requirements for the site.
